Phone: +92 (347) 8362105 | +92 (334) 4711105 • Email: chumerkhalil105@gmail.com

LinkedIn: [linkedin.com/in/umer-khalil-a2459b281](https://www.linkedin.com/in/umer-khalil-a2459b281) • Sahiwal, Punjab, Pakistan

PROFILE

A driven and technically proficient Software Engineering student specializing in **Flutter App Development** and **AI/Machine Learning engineering**. Experienced in building high-performance, cross-platform mobile applications integrated with intelligent features like Natural Language Processing (NLP), autonomous logic, and cloud databases. Combines strong programming fundamentals with hands-on DevOps and automated testing experience to deliver robust, scalable software solutions.

EDUCATION

COMSATS University Islamabad, Sahiwal Campus

2023 – Present

BS in Software Engineering (CGPA: 3.72)

Punjab College Chichawatni

2020 – 2022

F.Sc Pre-Engineering (Marks: 913/1100)

Sanabil Educational Complex Chichawatni

2018 – 2020

Matriculation (Marks: 1036/1100)

TECHNICAL SKILLS

Mobile & Web:	Flutter, Dart, Firebase (Firestore), SQLite, JavaScript, PHP, HTML5, CSS3, Bootstrap
AI & Data Science:	Natural Language Processing (NLP), Regression Models, Predictive Analytics, Python, R
DevOps & Tools:	Git/GitHub, GitLab CI/CD, Docker containerization, AWS, Linux Terminal
Software Testing:	Selenium WebDriver, Selenium IDE, JUnit/Eclipse (Unit Testing), JIRA (Agile)
Core Languages:	Python, Java, C++, Dart, SQL

PROJECTS

Smart Bite – AI-Integrated Mobile Application

- Developed a cross-platform mobile application utilizing **Flutter** and **Dart**, enabling independent ordering via table-mounted Android tablets.
- Integrated a multilingual **AI Chatbot** supporting English, Urdu, and Roman Urdu using **Natural Language Processing (NLP)** to process conversational voice and text commands.
- Implemented live data synchronization with Firestore for a Kitchen Display System (KDS) and automated GPS-based rider assignment.

Driver Guard – AI-Powered Resume Matcher & Screener

- Engineered an intelligent parsing system designed to process, structure, and filter thousands of unstructured CVs.
- Utilized **predictive criteria matching** and string analysis to automatically filter and short-list ideal candidates based on pre-defined job standards.

Autonomous Water Detection System – Hardware & AI Project

- Built an autonomous AI-driven vehicle using **Arduino** microcontrollers and sensor hardware integration.
- Programmed logic to analyze water turbidity using laser light refraction, generating real-time clarity metrics.

SOFT SKILLS & LANGUAGES

- **Core Strengths:** Problem-Solving, Team Collaboration, Decision Making, Continuous Technical Learning.
- **Languages:** Urdu (Fluent), English (Intermediate).
